l'energia e lo sviluppo economico sostenibile

ENEA and the first Software Heritage Mirror

“ software source code is a unique form of knowledge which is designed to be understood by a human being, the developer, and at the same time is easily converted into machine executable form”

[R.Di Cosmo, S.Zacchiroli, *iPRES 2017: 14th Inter. Conf. on Digital Preservation, Annual Symposium & summit on Software Heritage 2023*

UNESCO Headquarters, Paris

ENVIRONMENT and SUSTAINABILITY

ENERGY TECHNOLOGY

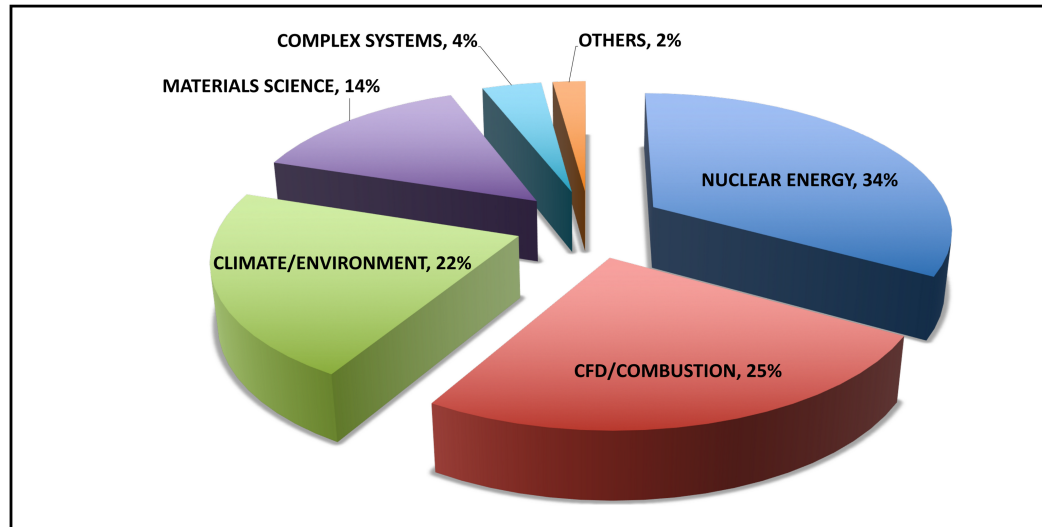

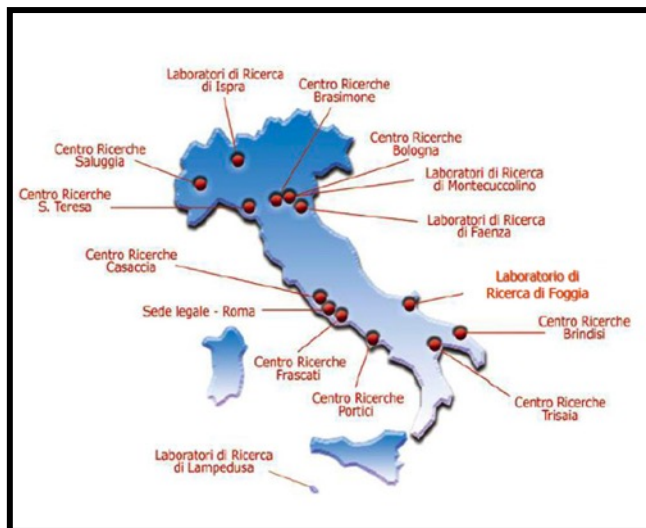

ENERGY EFFICIENCY

FUSION and NUCLEAR SAFETY

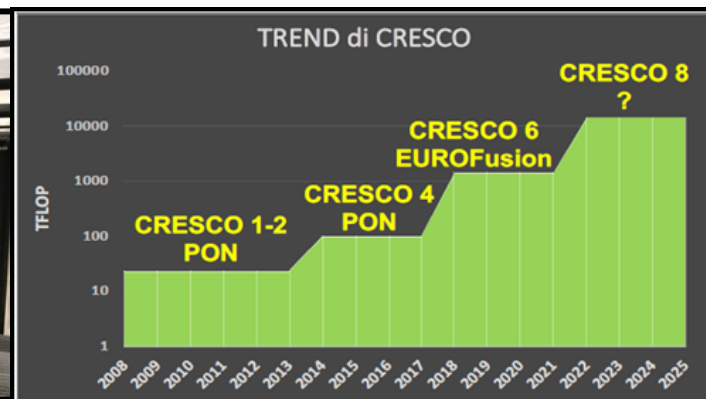

ENEA - since 1960 a long tradition in computational science and HPC infrastructures

CRESCO6 - Italian Tier1 HPC

- **Cores 20832, Nodes 434**
- **Peak performance 1.4 PF**

ENEA and the mirror of Software Heritage Archive

Software Heritage

A revolutionary infrastructure for software source code

**INRIA - ENEA Cooperation Agreement
a great adventure has started**

ENEAS: the [experimental] mirror

A mirror for

- improving project sustainability
- reducing data loss risk
- experimenting new solutions

based on 8 nodes

- 3 Dockers swarm nodes
- 1 DB server [34 TB]
- 4 storage servers [755 TB + 1PB Q1]

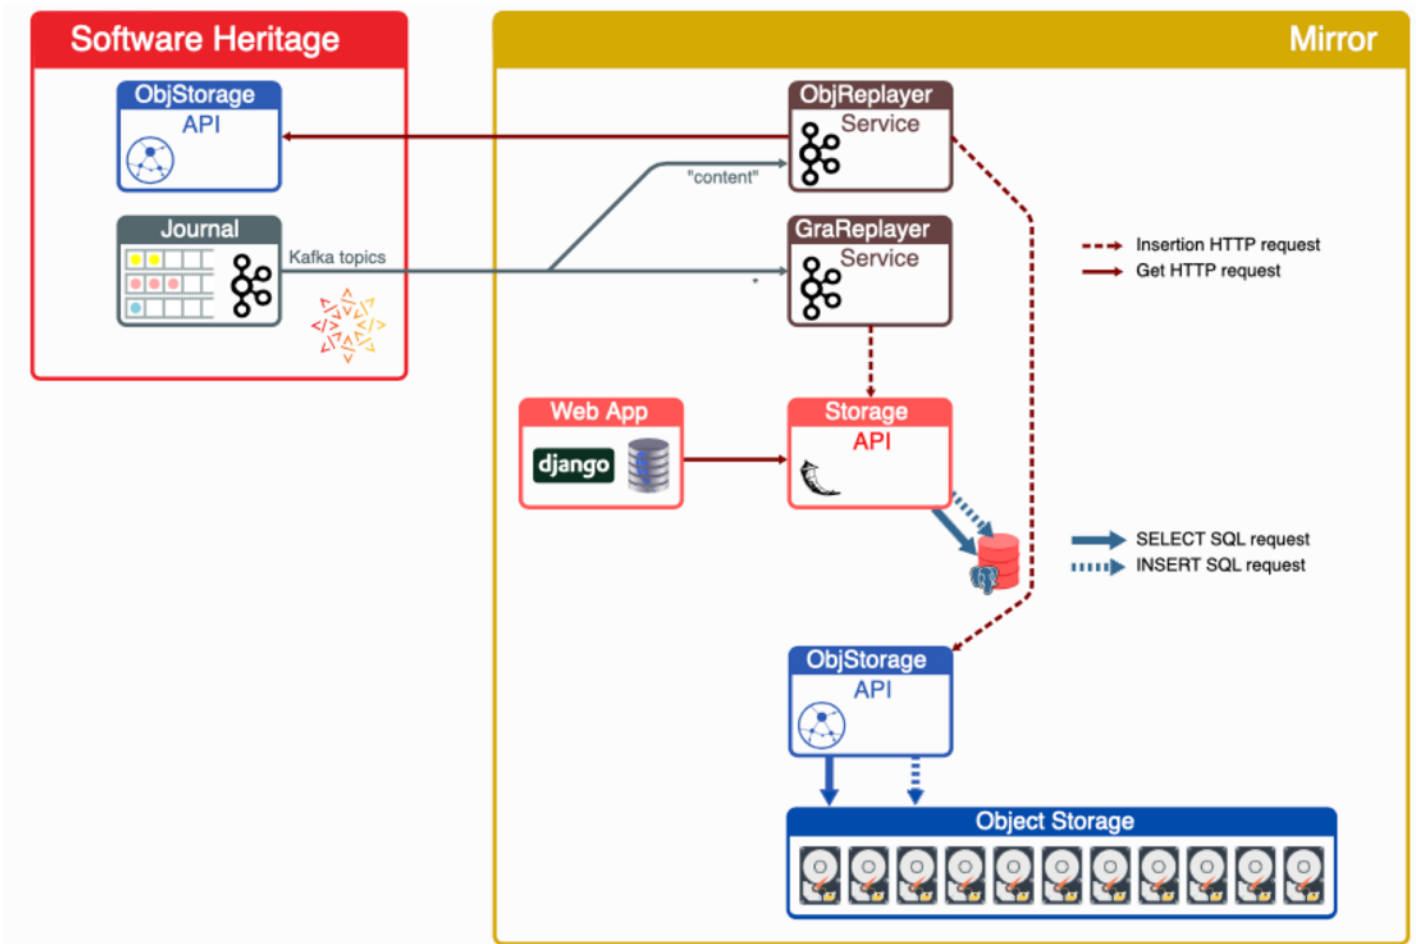

specific goal: testing SEAWEEEDFS

- highly scalable distributed file system
- to store billions of files
- to serve the files fast

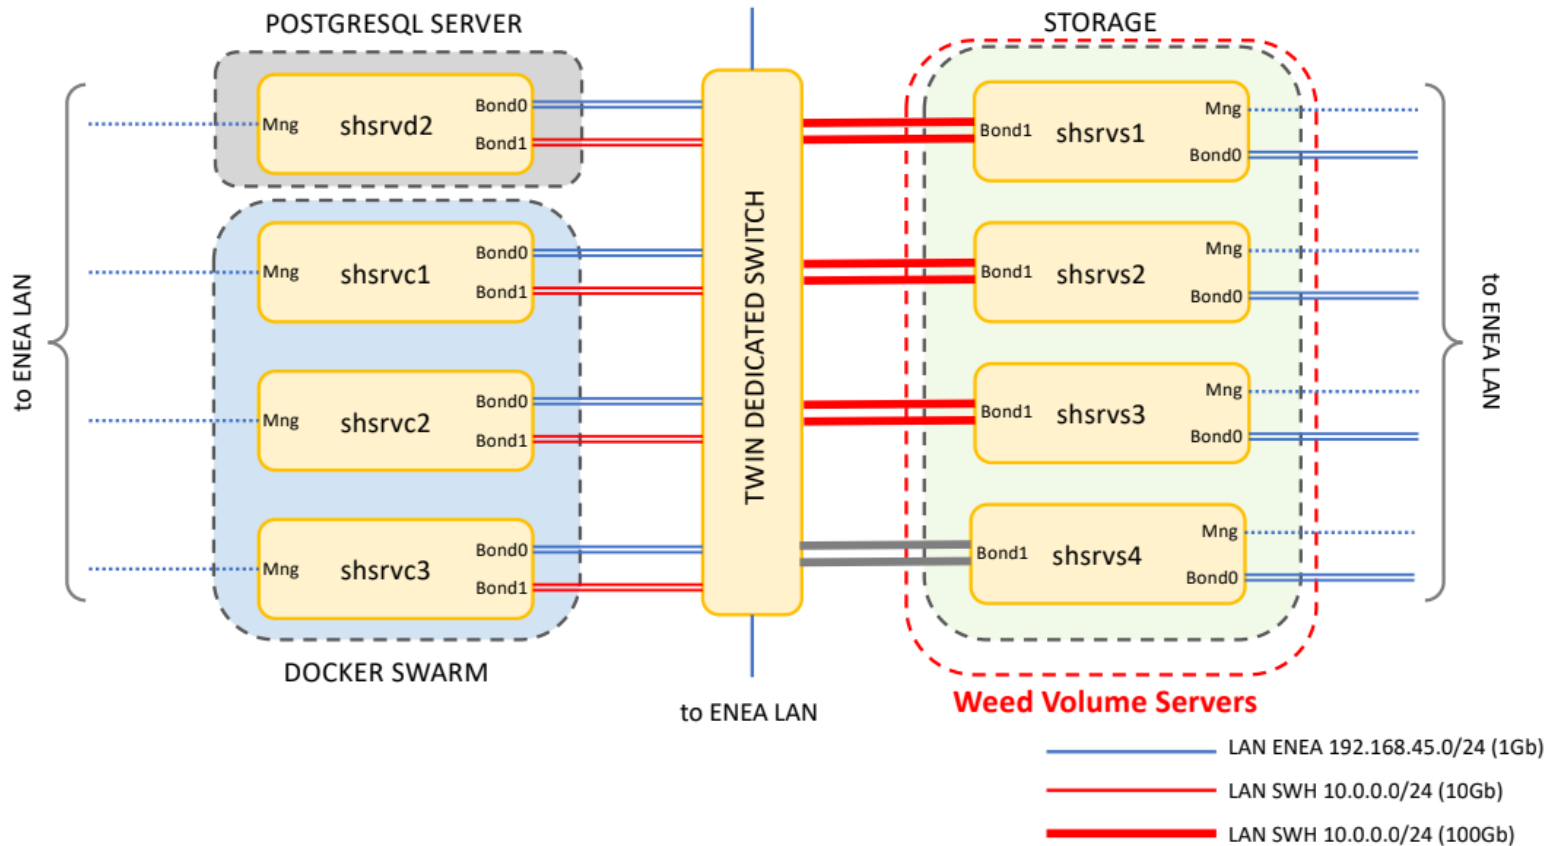

ENEA: the [experimental] mirror

ENEA: the [experimental] mirror

SWH ENEA Mirror Architecture

THE MIRROR WILL BE IN PRODUCTION ON JUNE 2023

ENEA & SH: the mirror as a research infrastructure

The Software Heritage's mirror as a starting point for research collaboration to:

- experiment the application of Machine Learning and AI for software development and programming languages practice
 - ▬ Big code as Big data
- develop new solutions for Big Archival Storage
- tackling the problem of “resilient digital heritage” against catastrophic loss of data and obsolescence of archiving tools
- involve young researchers in a relatively new field of investigation (Big Code/Big Data/BigStorage)

ENEA's SH mirror within the Big Data Technopole in Bologna

an area of 100.000 m2 - 1 billion € of investments for HPC - BigData - AI - QC

Emilia Romagna Region and the SH Mirror

The warmly welcome of Stefano Bonaccini the President of the Emilia Romagna Region to the Software Heritage's Mirror, entrusted to a post on Twitter.

*“Here is the world software archive.
Our data valley to serve people and to facing future challenges”*
