

Software Heritage

building an universal, open, shared, long term digital infrastructure

Roberto Di Cosmo

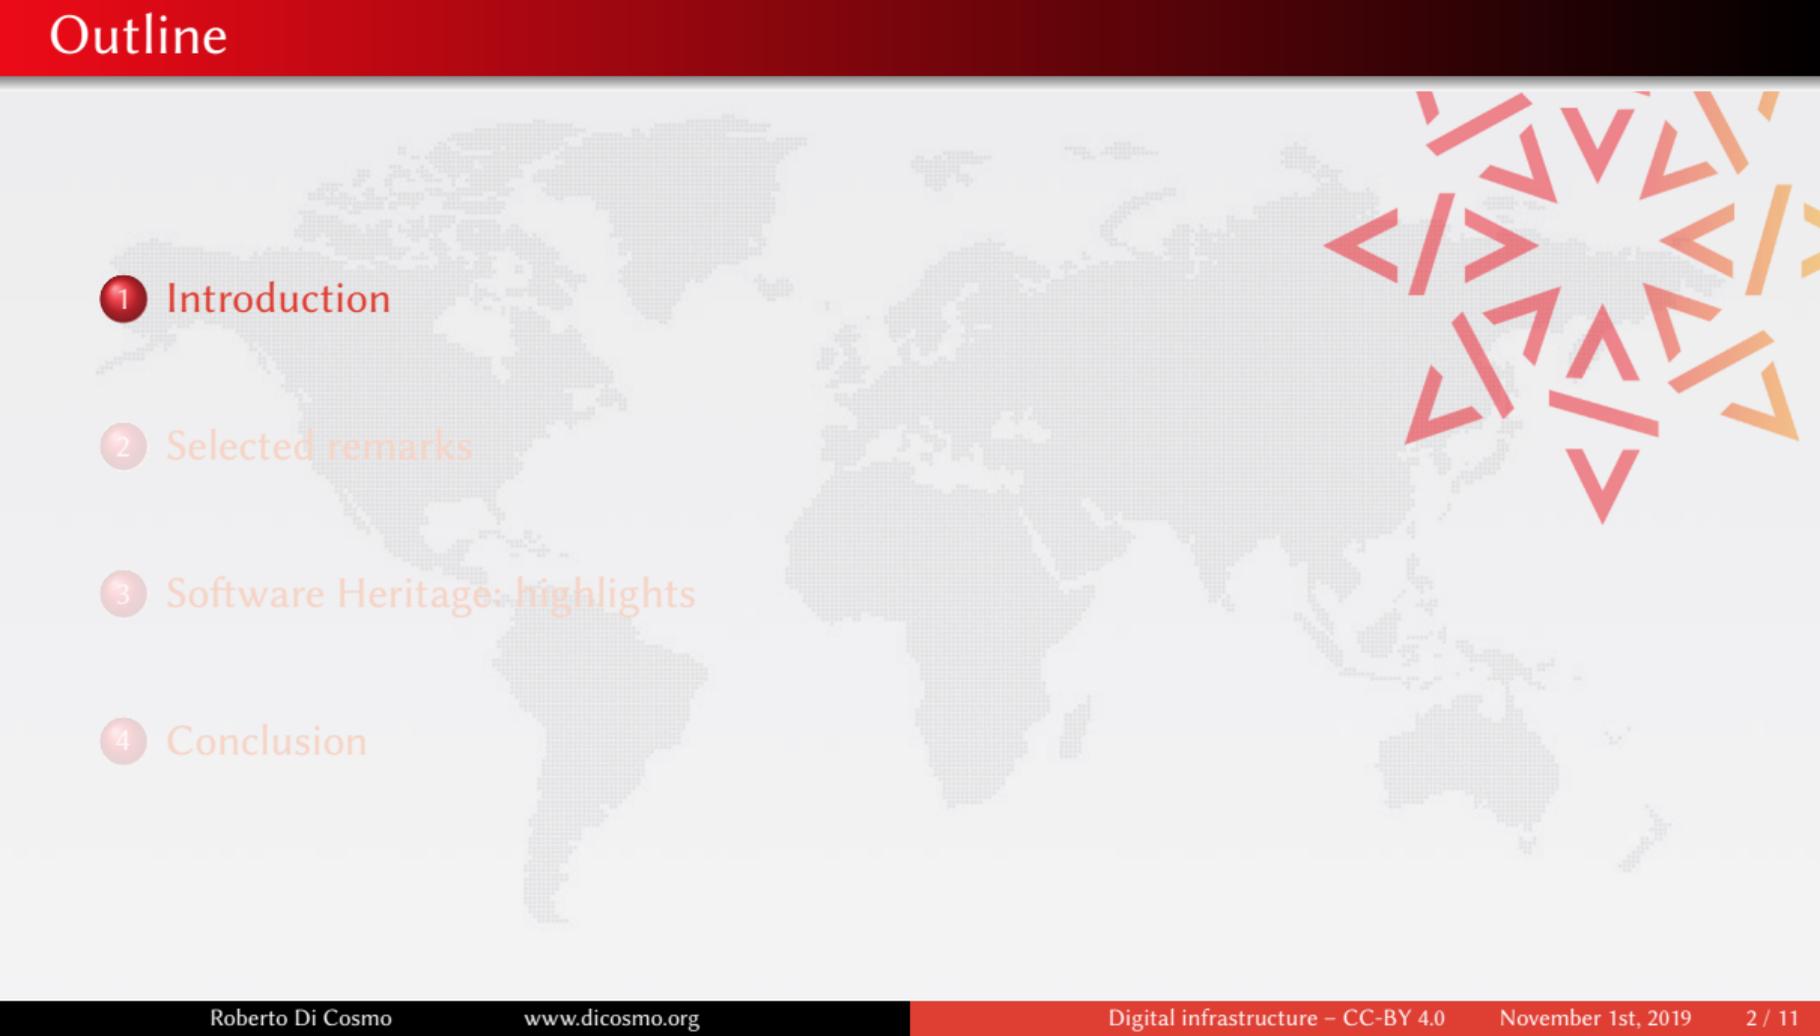

Digital Civil Society Conference, Stanford

November 1st, 2019

Software Heritage

THE GREAT LIBRARY OF SOURCE CODE

1 Introduction

2 Selected remarks

3 Software Heritage: highlights

4 Conclusion

Computer Science professor in Paris, now working at INRIA

- 30 years of research (Theor. CS, Programming, Software Engineering, Erdos #: 3)
- 20 years of Free and Open Source Software
- 10 years building structures for the common good

1980 my first computer: ZX80

1998 *Cybersnare* – voice of French FOSS

1999 *DemoLinux* – first live GNU/Linux distro

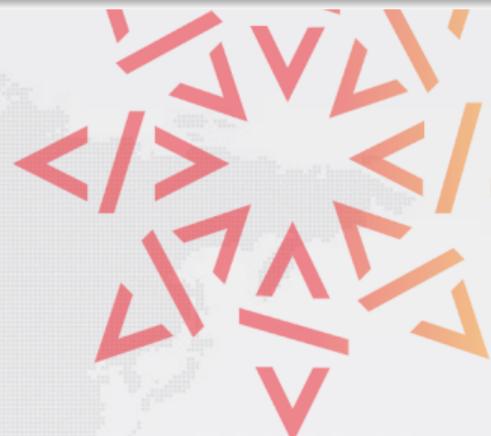

200x *Software Patents – Electronic voting*

2007 *Free Software Thematic Group*

150 members 50 projects 200Me

2015 *Software Heritage* at INRIA

2018 *National Committee for Open Science, France*

1 Introduction

2 Selected remarks

3 Software Heritage: highlights

4 Conclusion

Digital infrastructures are *special*

Invisible

Any sufficiently advanced technology is indistinguishable from magic

Arthur C. Clarke

Network effect

Utility grows as $O(n^2)$...

winner takes all → natural monopolies → need to choose: toll booth or commons?

Low upfront investment

remember Monica Lam's talk

For OSS, this may mean *built and deployed* without consensus, governance, sustainability plans

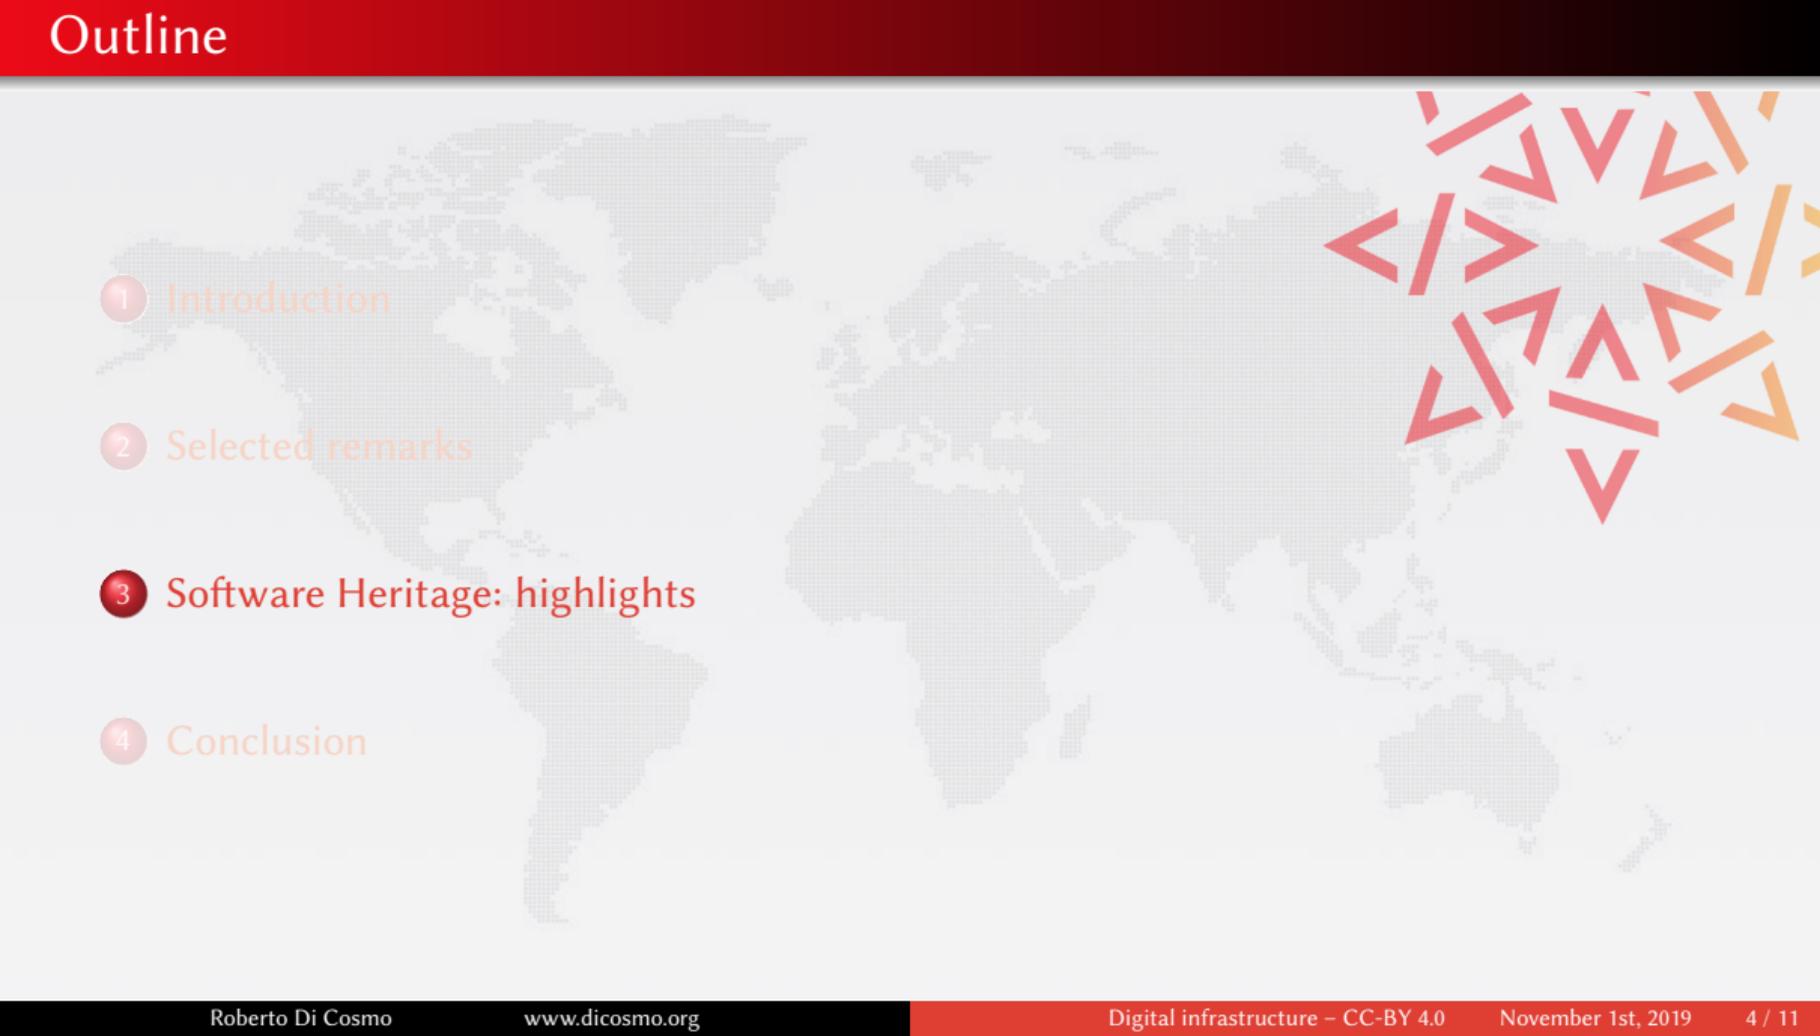

quote from OW2

Tragedy of the commons for OSS

Free riders take time to learn the lesson

Illusion of democracy for OSS

Good technology is *not* democratic

1 Introduction

2 Selected remarks

3 **Software Heritage: highlights**

4 Conclusion

"The source code for a work means the preferred form of the work for making modifications to it."

GPL Licence

Hello World

Program (excerpt of binary)

```
4004e6: 55
4004e7: 48 89 e5
4004ea: bf 84 05 40 00
4004ef: b8 00 00 00 00
4004f4: e8 c7 fe ff ff
4004f9: 90
4004fa: 5d
4004fb: c3
```

Program (source code)

```
/* Hello World program */

#include<stdio.h>

void main()
{
    printf("Hello World");
}
```

Source code is an essential part of our knowledge

Harold Abelson, *Structure and Interpretation of Computer Programs* (1985)

"Programs must be written for people to read, and only incidentally for machines to execute."

Len Shustek, Computer History Museum (2006)

"Source code provides a view into the mind of the designer."

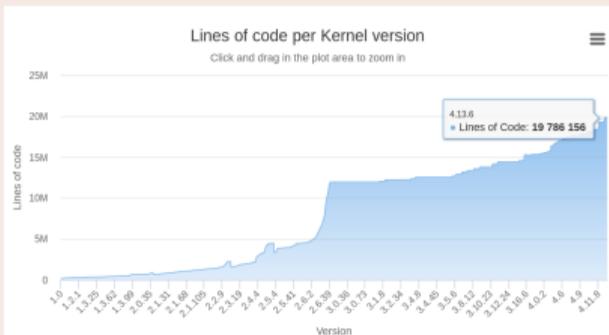

Apollo 11 (~60.000 lines), 1969

"When I first got into it, nobody knew what it was that we were doing. It was like the Wild West."

Margaret Hamilton

Linux Kernel (in your pockets!)

Software Heritage

THE GREAT LIBRARY OF SOURCE CODE

Mission

Collect, preserve and share the source code of all available software

Cultural Heritage

Industry

Research

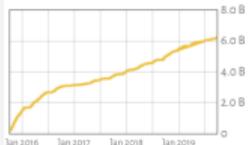

Education

Software Heritage

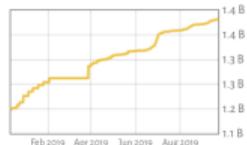

Source files

6,197,000,081

Commits

1,379,380,527

Projects

90,231,104

Raise awareness

- make visible the unseen
- actions in the policy space
- build communities

Plan for the long term...

not a "project"!

- shared infrastructure
- multiple funders, mirror network
- incubate **inside** an institution

Technology

- transparency and FOSS
- replicas all the way down

Content

- intrinsic identifiers
- facts and provenance

Organization

- non-profit
- multi-stakeholder

Software Heritage's key dates

Summer 2015

The collection starts: first server, (very) early prototype

June 30th 2016

Public unveiling, with the first sponsors: Microsoft and DANS

April 3rd 2017

Unesco - Inria agreement on software access and preservation.

June 7th 2018

Opening the archive to the world

February 26th 2019

Expert meeting

Paris Call on

Software Source Code

June 10th 2019

Software Heritage

Acquisition Process

with UNESCO and UniPi

An international, non profit initiative

Sharing the vision

United Nations
Educational, Scientific and
Cultural Organization

And many more ...

Donors, members, sponsors

Platinum sponsors

Golden sponsor

MINISTRE
DE L'ENSEIGNEMENT SUPERIEUR,
DE LA RECHERCHE
ET DE L'INNOVATION

Silver sponsors

Liberté • Egalité • Fraternité
REPUBLIQUE FRANÇAISE

Bronze sponsors

Actions in the policy space: zoom on the EU

Europe: Copyright reform

adopted March 28 2019

"Upload filters": a threat to all modern software development

- developing platforms (GitHub, GitLab, Bitbucket, etc.)
- **distribution platforms (Maven, Pypi, CRAN, CTAN, etc.)**
- **archives (Software Heritage)**

We got an exclusion for

*non for profit open source software developing **and sharing** platforms*

Key role of Software Heritage

policy-maker awareness, essential insights for NGOs, government contacts

Bottomline

Building infrastructures like Software Heritage is **much more** than technology!

1 Introduction

2 Selected remarks

3 Software Heritage: highlights

4 Conclusion

Come in, we're open!
